

# WHERE AEROSPACE LIVES

Chances are your landing gear was made in Ontario – where the landing systems of 75% of Boeing and Airbus commercial aircraft programs are produced. Aerospace plays a key role in Ontario’s economy, part of a diverse advanced manufacturing sector producing the next generation of aerospace, robotics, artificial intelligence, machinery, printable electronics and more. And this is where elite digital talent meets the real economy.

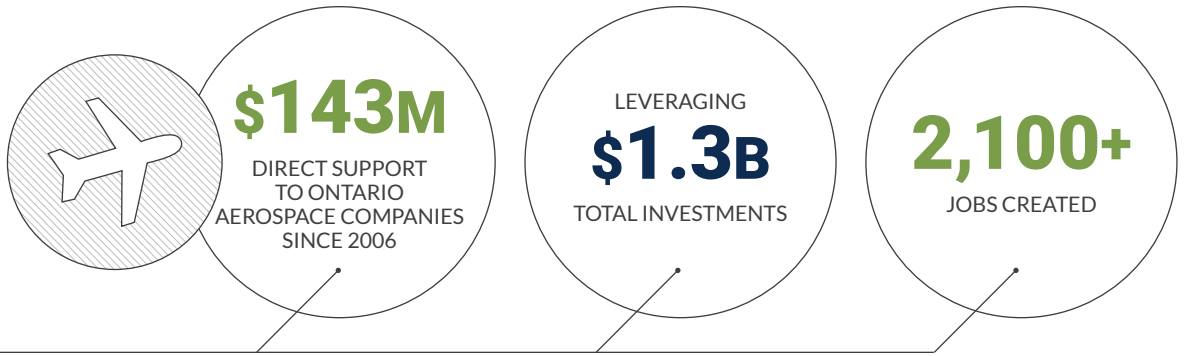

## ONTARIO’S AEROSPACE INDUSTRY BY THE NUMBERS

## CONTINUED INVESTMENT BY ONTARIO COMPANIES, BY THE MILLIONS:

Federal and provincial programs support aerospace investment by providing funding for capital equipment, research and development partnerships.

## SUCCESS STORY

**SHIMCO**, a manufacturer of high-precision aerospace parts, has developed a Centre of Excellence to further its R&D in advanced manufacturing. The investment in research has paid off in the form of approval as a Tier 1 supplier to Airbus Defence and Space. In addition to Airbus, Shimco is an approved supplier to Bombardier, Safran and Mitsubishi.

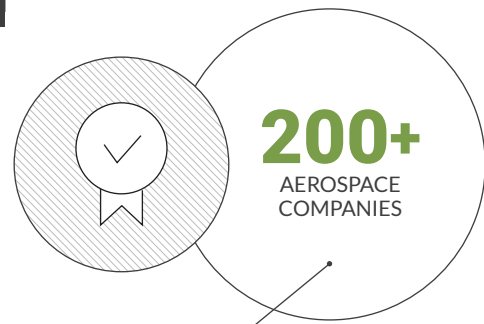

In a highly collaborative business environment, **IDEAS TAKE FLIGHT.** Ontario is where advanced R&D facilities, best-in-class academic institutions and leading-edge businesses collaborate to transform game-changing ideas into expertly crafted products for the global market.

## Ontario Expertise and leadership in:

- Aircraft integration
- Landing gear
- Aerostructures
- Avionics and electronic systems
- Satellites and space systems
- Unmanned Aerial Vehicle (UAV) platforms and payloads
- Data analytics
- Robotics
- Engineering
- Maintenance, Repair and Operations (MRO)

**Downsview Aerospace Innovation and Research DAIR** brings together industry and academia to create an aerospace hub in Toronto that will develop the next generation of aerospace technologies.

Meeting the full spectrum of aerospace demand, these companies are manufacturing and developing aircraft, small turbine engines, landing gear systems, aerospace structures and electrical systems.
